

# Case Comments

- Click the patient's name from the dashboard or find them via search patients
- Click the "+" on the Comments section

Case Comments is a HIPAA secure way to engage others on one of your patient's cases. You can use case comments to get in touch with BeamReaders Support, ask your Radiologist a question or converse with others that you've shared the case with. Those involved with the comment will get an e-mail notification that a comment has been made with a hyperlink to take them into the secure portal to view the message.
